LAW ENFORCEMENT AERIAL PLATFORM SYSTEM (LEAPS) PROVIDES AERIAL OBSERVATION SURVEILLANCE FOR THE CITY OF LANCASTER AND THE LASD

During July 2017, LASD formally logged 112 LEAPS service calls where tactical field operations were supported. LEAPS was dispatched 154 times totaling 40.3 hours and was airborne and available for 349.1 hours of deterrent strategic surveillance.

LEAPS provided airborne observation and support in the arrest of 40 suspects. An increase in the number of vehicle calls was noted. Additionally, 4 reserve deputies have been trained and are proficient in operating LEAPS, resulting in a greatly increased utilization and reduction in safety hazard exposure to LASD Deputies and Lancaster Citizens.

The LEAPS TASE 400 sensor was returned to service after being repaired. Samples of new TASE 400 captured video is available for view at <http://aeroviewllc.com/video/website>
