LAW ENFORCEMENT AERIAL PLATFORM SYSTEM (LEAPS) PROVIDES AERIAL OBSERVATION SURVEILLANCE FOR THE CITY OF LANCASTER AND THE LASD

During September 2017, LASD formally logged 92 LEAPS service calls where tactical field operations were supported. LEAPS was dispatched 165 times totaling 33.8 hours and was airborne and available for 309.1 hours.

LEAPS provided airborne observation and support in the arrest of 28 suspects. LEAPS was used to support serving a search warrant and LAN-CAP team request resulting in suspect arrests with minimal safety hazard exposure to Deputies and Lancaster Citizens.

The LEAPS Sensor was a TASE 400 sensor used for the entire month, providing greatly enhanced day and night sensor performance. An aircraft engine change was performed at the end of the month and reduced the available hours. Additional training and orientation has been provided to LASD active and Reserve Deputies, who are being utilized as LEAPS ground system operators.

In addition to providing a force multiplier to the LASD in support of criminal activity suppression and deterrence, and search and rescue support, the LEAPS activity returns 99% of its revenue to the Lancaster community in the form of (1) salaries for pilots and systems support staff, (2) ongoing support from businesses at Fox Field for airframe maintenance and FAA compliance, avionics support and fuel, (3) ongoing support from local Lancaster businesses for purchasing and fabrication of LEAPS components and subsystems, and (4) local taxes and fees. This is further underpinned by Aero View LLC's commitment to remain headquartered in Lancaster for ten years. Taxes and fees account for less than 1% of costs. The LEAPS also provides the City of Lancaster with tactical and strategic reconnaissance support for (1) civic functions and activities, (2) emergency first responder support and (3) Department of Public Safety activities.
